

Hello!

The 8th graders have a homework assignment to complete this weekend and they may or may not need your assistance.

Their assignment is to create an **Evernote account**. Evernote is a free online site/app that I am going to use in my classroom this year. Regardless of whether students have mobile devices or technology they can use at school, students will still be able to utilize some of the site's features to maintain a writing portfolio, organize research items, and access class notes from home.

By creating an account now, I will be able to share a class notebook with them allowing me to upload notes, assignments, practice tests, videos, links, and anything else they may need to access.

As a parent, you will also have access to the notebook by clicking this link:

An Evernote account is not necessary to access this notebook; however, I do want my students to create an account to use for their writing portfolios.

I walked each class through the assignment, but I have also attached the homework directions to this email. Feel free to email me if you have any questions.

Have a great weekend!

Jordan Collier
